Harvest of Stars By Poul Anderson

The virtual persona of a long-dead visionary entrepreneur threatens to incite a revolution from space that could topple Earth's powerful and repressive religious-technological dictatorship in this ingenious science fiction classic

In the future, individual freedom is a thing of the past. North America is a police state controlled by the Avantist government, a despotic, techno-religious ruling order that promises an impending transcendence for the oppressed. Space, however, remains free, thanks to Anson Guthrie's powerful Fireball Corporation. Guthrie's corporeal self died many generations ago, but his essence lives on, preserved forever in a computerized state that enables him to inspire his loyal employees and adherents to keep reaching for the farthest stars. But now the totalitarian enemy, led by sadistic secret policeman Enrique Sayre, has gained possession of a Guthrie download, intending to subvert it to the Avantist cause, thereby breaking Fireball's hold on the cosmos. The corporation is doomed unless ace pilot Kyra Davis can smuggle a still-unreconstructed version of Guthrie out of enslaved America and rocket him to the moon and beyond, where Fireball's virtual creator can attempt to stoke the flames of revolution—and change the direction of his world.

A truly remarkable work from one of science fiction's all-time greats, *Harvest of Stars* might be the most ingenious and ambitious novel of Grand Master Poul Anderson's acclaimed and prolific career. Thoughtful and adventurous, rich in imagination and integrity, it offers definitive proof of the seven-time Hugo Award—winning author's unparalleled mastery in the field of speculative fiction.

Editorial Review

Review

"Poul puts us into a whole new world. It is, in that respect, a novel written more in the manner of Fielding and Melville than that of traditional SF. Poul has traced a thousand trends, pulled them tightly together, and created a masterpiece." —Larry Niven

"Anderson has sweep, scope, and a romantic vision of our future in space." —Chicago Sun-Times

"All the elements of classic SF on a grand scale." —Publishers Weekly

"Anderson's speculations of artificial intelligences, biotech and nanotech are first-rate and his lyrical prose makes his novel literally sing." —AllReaders.com

About the Author

Poul Anderson (1926–2001) grew up bilingual in a Danish American family. After discovering science fiction fandom and earning a physics degree at the University of Minnesota, he found writing science fiction more satisfactory. Admired for his "hard" science fiction, mysteries, historical novels, and "fantasy with rivets," he also excelled in humor. He was the guest of honor at the 1959 World Science Fiction Convention and at many similar events, including the 1998 Contact Japan 3 and the 1999 Strannik Conference in Saint Petersburg, Russia. Besides winning the Hugo and Nebula Awards, he has received the Gandalf, Seiun, and Strannik, or "Wanderer," Awards. A founder of the Science Fiction & Fantasy Writers of America, he became a Grand Master, and was inducted into the Science Fiction and Fantasy Hall of Fame.

In 1952 he met Karen Kruse; they married in Berkeley, California, where their daughter, Astrid, was born, and they later lived in Orinda, California. Astrid and her husband, science fiction author Greg Bear, now live with their family outside Seattle.
