

Multimedia Programming Using Max/MSP and TouchDesigner

By Patrik Lechner

Multimedia Programming Using Max/MSP and TouchDesigner By Patrik Lechner

A step-by-step guide to designing, building, and refining immersive audio-visual applications and performance environments using Max and TouchDesigner

About This Book

- Create efficient audio processing tools using Max
- Generate stunning real-time graphics using TouchDesigner
- Develop well-structured multimedia projects using basic as well as the most advanced programming and integration techniques

Who This Book Is For

If you want to learn how to use Max 6 and/or TouchDesigner, or work in audio-visual real-time processing, this is the book for you. It is intended for intermediate users of both programs and can be helpful for artists, designers, musicians, VJs, and researchers. A basic understanding of audio principles is advantageous.

What You Will Learn

- Build well-structured systems for multimedia
- Build audio synthesis tool using Max/MSP
- Create versatile sampling programs
- Design tools to generate visuals from scratch with TouchDesigner
- Generate audio-visual systems using tools such as Gen and Jitter
- Apply a procedural approach to both audio and video
- Get to grips with both rapid prototyping and beginner's examples as professional design principles
- Expand your tools and generate custom tool sets for future projects

In Detail

Max 6 and TouchDesigner are both high-level visual programming languages based on the metaphor of connecting computational objects with patch cords.

This guide will teach you how to design and build high-quality audio-visual systems in Max 6 and TouchDesigner, giving you competence in both designing and using these real-time systems. In the first few chapters, you will learn the basics of designing tools to generate audio-visual experiences through easy-to-follow instructions aimed at beginners and intermediate. Then, we combine tools such as Gen, Jitter, and TouchDesigner to work along with Max 6 to create 2D and 3D visualizations, this book provides you with tutorials based on creating generative art synchronized to audio. By the end of the book, you will be able to design and structure highly interactive, real-time systems.

Editorial Review

About the Author

Patrik Lechner

Patrik Lechner started making electronic music at the age of 16, and soon discovered environments such as Pure Data and Max/MSP. From then on, he developed many tools for his own experimental music, and it wasn't long after this that he started creating generative 3D visualizations of audio material. Since then, he has devoted nearly all his life to real-time audio/video processing and generation. Patrik worked as an audio engineer for an Austrian TV station for years, and taught Max/MSP both privately and at institutions. For instance, he conducted workshops for the audio engineers of the Burgtheater Vienna, and since 2012, he has been working for the University of Applied Sciences in St. Polten (FH St. Polten). Patrik has worked on many multimedia projects, for example, an installation at the Festspielhaus Baden-Baden for the Institut für CreativeMedia/Technologies, FH St. Polten, and an interactive audio installation in Dubai. As an artist, he did audiovisual performances in Austria, Italy, Germany, Mexico, Canada, and Dubai, and regularly played at the Austrian Pavilion at the world exhibition in Shanghai 2010. He worked a lot with classically trained musicians, developed a real-time scoring system/piece for a string quartet that premiered in 2012, and frequently works with painters and artists from other fields.

Users Review

From reader reviews:

Fabiola Stewart:

This Multimedia Programming Using Max/MSP and TouchDesigner book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This particular Multimedia Programming Using Max/MSP and TouchDesigner without we recognize teach the one who studying it become critical in considering and analyzing. Don't possibly be worry Multimedia Programming Using Max/MSP and TouchDesigner can bring when you are and not make your bag space or bookshelves' turn out to be full because you can have it with your lovely laptop even phone. This Multimedia Programming Using Max/MSP and TouchDesigner having very good arrangement in word and also layout, so you will not feel uninterested in reading.

Tyler Woodley:

Now a day people that Living in the era wherever everything reachable by connect with the internet and the resources within it can be true or not call for people to be aware of each facts they get. How people have to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Reading through a book can help persons out of this uncertainty Information especially this Multimedia Programming Using Max/MSP and TouchDesigner book as this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it everbody knows.

Carol Jackson:

A lot of people always spent their particular free time to vacation as well as go to the outside with them friends and family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity here is look different you can read a book. It is really fun for yourself. If you enjoy the book that you read you can spent the whole day to reading a guide. The book Multimedia Programming Using Max/MSP and TouchDesigner it is extremely good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy often the e-book. You can m0ore easily to read this book from a smart phone. The price is not very costly but this book provides high quality.

Joseph Mattie:

In this period of time globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. The actual book that recommended for you is Multimedia Programming Using Max/MSP and TouchDesigner this reserve consist a lot of the information with the condition of this world now. That book was represented how can the world has grown up. The terminology styles that writer value to explain it is easy to understand. Typically the writer made some exploration when he makes this book. Honestly, that is why this book acceptable all of you.
