Neural Crest and Placodes (Current Topics in Developmental Biology) From Academic Press

Neural Crest and Placodes provides in-depth coverage of the topic, including information on their critical role in vertebrate development, evolution, and the way defects in their development underlie a wide range of congenital disorders. It delves deep into advances made in our understanding of the mechanisms governing the formation, migration, and differentiation of these two cell populations, also discussing their integration during embryonic development.

The text highlights the application of fundamental knowledge in investigating the etiology and pathogenesis of congenital disorders and the ways the data applies to the field of regenerative medicine.

- Written by leading experts in the field
- Includes descriptions of the most recent advances in the field
- Highlights the applications of this knowledge in investigating the etiology and pathogenesis of congenital disorders
- Explores their usage in the field of regenerative medicine

Editorial Review

About the Author

Paul Trainor, PhD is an Investigator at the Stowers Institute for Medical Research in Kansas City, MO USA with over 20 years of experience working in the fields of developmental biology, neurobiology and craniofacial morphogenesis. He received his PhD from the University of Sydney, Australia under the tutelage of Dr Patrick Tam before undertaking post-doctoral training with Dr Robb Krumlauf at the National Institute for Medical Research in London, England. The current emphasis of Dr Trainor's research centres on the role of neural crest cells in craniofacial evolution, development and disease. He seeks to understand the mechanisms that regulate neural crest cell patterning and apply this basic knowledge to decipher the etiology and pathogenesis of birth defects and potentially develop therapeutic avenues for their prevention. His laboratory studies neurocristopathies (disorders of neural crest cell development) such as Treacher Collins syndrome, Holoprosencephaly and Syngnathia as well as other neurocristopathy disorders such as Hirschsprung disease. Dr Trainor is currently vice-president of the Society for Craniofacial Genetics and Development.

Users Review

From reader reviews:

Marcus Laws:

The book Neural Crest and Placodes (Current Topics in Developmental Biology) can give more knowledge and also the precise product information about everything you want. Why must we leave the great thing like a book Neural Crest and Placodes (Current Topics in Developmental Biology)? Some of you have a different opinion about reserve. But one aim which book can give many info for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or facts that you take for that, you may give for each other; it is possible to share all of these. Book Neural Crest and Placodes (Current Topics in Developmental Biology) has simple shape however you know: it has great and large function for you. You can seem the enormous world by open up and read a book. So it is very wonderful.

Michelle Oquinn:

The book untitled Neural Crest and Placodes (Current Topics in Developmental Biology) contain a lot of information on that. The writer explains your girlfriend idea with easy means. The language is very simple to implement all the people, so do certainly not worry, you can easy to read this. The book was published by famous author. The author brings you in the new period of time of literary works. You can actually read this book because you can continue reading your smart phone, or gadget, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can available their official web-site in addition to order it. Have a nice examine.

Stacy Knarr:

Is it a person who having spare time then spend it whole day by simply watching television programs or just lying on the bed? Do you need something totally new? This Neural Crest and Placodes (Current Topics in Developmental Biology) can be the solution, oh how comes? A book you know. You are so out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Marline Deluca:

You may get this Neural Crest and Placodes (Current Topics in Developmental Biology) by look at the bookstore or Mall. Just viewing or reviewing it can to be your solve problem if you get difficulties for ones knowledge. Kinds of this e-book are various. Not only by means of written or printed but additionally can you enjoy this book through e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
