Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) By Carlo Zaniolo, Stefano Ceri, Christos Faloutsos, Richard T. Snodgrass, V.S. Subrahmanian, Roberto Zicari

The database field has experienced a rapid and incessant growth since the development of relational databases. The progress in database systems and applications has produced a diverse landscape of specialized technology areas that have often become the exclusive domain of research specialists. Examples include active databases, temporal databases, object-oriented databases, deductive databases, imprecise reasoning and queries, and multimedia information systems. This book provides a systematic introduction to and an in-depth treatment of these advanced database areas. It supplies practitioners and researchers with authoritative coverage of recent technological advances that are shaping the future of commercial database systems and intelligent information systems.

Advanced Database Systems was written by a team of six leading specialists who have made significant contributions to the development of the technology areas covered in the book. Benefiting from the authors' long experience teaching graduate and professional courses, this book is designed to provide a gradual introduction to advanced research topics and includes many examples and exercises to support its use for individual study, desk reference, and graduate classroom teaching.

Editorial Review

From the Back Cover

The database field has experienced a rapid and incessant growth since the development of relational databases. The progress in database systems and applications has produced a diverse landscape of specialized technology

areas that have often become the exclusive domain of research specialists. Examples include active databases, temporal databases, object-oriented databases, deductive databases, imprecise reasoning and queries, and multimedia information systems. This book provides a systematic introduction to and an in-depth treatment of these advanced database areas. It supplies practitioners and researchers with authoritative coverage of

recent technological advances that are shaping the future of commercial database systems and intelligent information systems.

Advanced Database Systems was written by a team of six leading specialists who have made significant contributions to the development of the technology areas covered in the book. Benefiting from the authors' long experience teaching graduate and professional courses, this book is designed to provide a gradual introduction to advanced research topics and includes many examples and exercises to support its use for individual study, desk reference, and graduate classroom teaching.

About the Author

Carlo Zaniolo holds the Friedman Chair in Knowledge Sciences at the University of California, Los Angeles. He is an active researcher in the areas of database, knowledge bases, and intelligent databases.

Stefano Ceri is Professor of Database Systems at Politecnico di Milano. His research interests are focused on extending database technology to incorporate data distribution, deductive and active rules, and object orientation.

Christos Faloutsos is Associate Professor of Computer Science at the University of Maryland, College Park. His research interests include physical database design, searching methods for text, geographic information systems, and indexing methods for medical and multimedia databases.

Richard T. Snodgrass is Professor of Computer Science at the University of Arizona, and co-director of the TimeCenter, an international center for the support of temporal database applications on traditional and emerging DBMS technologies. His research interests include temporal databases, query language design, query optimization and evaluation, storage structures, database design, and software development databases.

V.S. Subrahmanian is Associate Professor of Computer Science at the University of Maryland, College Park, where his work focuses on incomplete and uncertain information in databases and knowledge bases,

integrated heterogeneous data and software, and multimedia systems. V.S. Subrahmanian was awarded his Ph.D. in Computer Science from Syracuse University in 1989. He is an Associate Professor in the Computer Science Department at the University of Maryland, where he also heads the Multimedia Systems Laboratory. He is the recipient of the prestigious National Science Foundation Young Investigator Award, and the Distinguished Young Scientist Award from the Maryland Academy of Sciences. He has worked extensively in knowledge bases, synthesizing techniques in artificial intelligence, and database engineering. He is an editor of the IEEE Transactions on Knowledge and Data Engineering and AI Communications Journal, and co-author of Advanced Database Systems (1997 Morgan Kaufmann Publishers, Inc.).

Roberto Zicari is Professor of Computer Science at the Johann Wolfgang Goethe University in Frankfurt, and an internationally recognized expert in the field of object database systems.

Users Review

From reader reviews:

Pearlie Henry:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a guide. Beside you can solve your trouble; you can add your knowledge by the publication entitled Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems). Try to the actual book Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) as your friend. It means that it can to be your friend when you truly feel alone and beside those of course make you smarter than before. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know everything by the book. So , let's make new experience as well as knowledge with this book.

Margert Lewis:

The feeling that you get from Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) could be the more deep you looking the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) giving you thrill feeling of reading. The author conveys their point in selected way that can be understood by anyone who read it because the author of this publication is well-known enough. This specific book also makes your own personal vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) instantly.

Eva Ammons:

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The particular book that recommended for you is Advanced Database Systems (The Morgan Kaufmann Series in Data Management

Systems) this publication consist a lot of the information with the condition of this world now. This book was represented how does the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some research when he makes this book. This is why this book appropriate all of you.

Patricia Koop:

You can obtain this Advanced Database Systems (The Morgan Kaufmann Series in Data Management Systems) by browse the bookstore or Mall. Just viewing or reviewing it may to be your solve trouble if you get difficulties for ones knowledge. Kinds of this guide are various. Not only by written or printed but additionally can you enjoy this book by simply e-book. In the modern era like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose suitable ways for you.
