

Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science)

By Jan Ehmke

Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) By Jan Ehmke

As urban congestion continues to be an ever increasing problem, routing in these settings has become an important area of operations research. This monograph provides cutting-edge research, utilizing the recent advances in technology, to quantify the value of dynamic, time-dependent information for advanced vehicle routing in city logistics. The methodology of traffic data collection is enhanced by GPS based data collection, resulting in a comprehensive number of travel time records. Data Mining is also applied to derive dynamic information models as required by time-dependent optimization. Finally, well-known approaches of vehicle routing are adapted in order to handle dynamic information models.

This book interweaves the usually distinct areas of traffic data collection, information retrieval and time-dependent optimization by an integrated methodological approach, which refers to synergies of Data Mining and Operations Research techniques by example of city logistics applications. These procedures will help improve the reliability of logistics services in congested urban areas.?

Editorial Review

From the Back Cover

As urban congestion continues to be an ever increasing problem, routing in these settings has become an important area of operations research. This monograph provides cutting-edge research, utilizing the recent advances in technology, to quantify the value of dynamic, time-dependent information for advanced vehicle routing in city logistics. The methodology of traffic data collection is enhanced by GPS based data collection, resulting in a comprehensive number of travel time records. Data Mining is also applied to derive dynamic information models as required by time-dependent optimization. Finally, well-known approaches of vehicle routing are adapted in order to handle dynamic information models.

This book interweaves the usually distinct areas of traffic data collection, information retrieval and time-dependent optimization by an integrated methodological approach, which refers to synergies of Data Mining and Operations Research techniques by example of city logistics applications. These procedures will help improve the reliability of logistics services in congested urban areas.

About the Author

Jan Fabian Ehmke has been committed to optimization of urban transportation since his days as a high school student. He majored in Decision Support, Information Systems, and Urban Traffic Management at Technical University of Braunschweig. Besides his university obligations, he worked in consulting engineer's office, and in 2007 he joined Dr. Dirk Christian Mattfeld's group as a research assistant. Since then he has been involved in a variety of traffic and transportation projects ranging from industry collaborations to purely academic contexts. Having a background in management science, he has focused on interweaving the commonly distinct areas of information systems, operations research, and traffic engineering. Ehmke has continuously published and presented his work, receiving particular attention from the aforementioned scientific communities. His recently finished PhD thesis involves a comprehensive treatment of the distinct areas' contributions to dynamic routing of city logistics services. He is currently preparing for a PostDoc visit at the University of Iowa.

Users Review

From reader reviews:

Diane Dean:

What do you about book? It is not important together with you? Or just adding material when you want something to explain what you problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to complete others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. They should answer that question due to the fact just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this kind of Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) to read.

Jordan Weatherspoon:

A lot of people always spent their free time to vacation or even go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book you read you can spent the entire day to reading a reserve. The book Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) it doesn't matter what good to read. There are a lot of folks that recommended this book. They were enjoying reading this book. When you did not have enough space to develop this book you can buy typically the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not to fund but this book offers high quality.

Susan Arnold:

This Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) is great publication for you because the content that is full of information for you who all always deal with world and have to make decision every minute. That book reveal it info accurately using great coordinate word or we can claim no rambling sentences inside it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but hard core information with splendid delivering sentences. Having Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) in your hand like getting the world in your arm, info in it is not ridiculous one particular. We can say that no book that offer you world in ten or fifteen moment right but this publication already do that. So , this really is good reading book. Hey Mr. and Mrs. hectic do you still doubt that will?

Rosemary Taylor:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you will get it in e-book approach, more simple and reachable. This kind of Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science) can give you a lot of close friends because by you investigating this one book you have thing that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This guide offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great persons. So , why hesitate? Let us have Integration of Information and Optimization Models for Routing in City Logistics (International Series in Operations Research & Management Science).
