Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics) By Frederick Betz

This book aims to explore stability in an international financial system using disequilibrium theory. It examines historical cases of both instability and stability and reviews price-disequilibrium theory to construct a theoretical model for a stable international financial system.

In the modern knowledge economy in a global world, financial socio-technical systems still continue to be central to global commerce. Moreover, technological advances in computer and communications have changed both the knowledge economy and the financial system. While globalization and technology have made international finance more powerful and important to knowledge economies, they have also increased the volatility, instability, and fraudulent use of international finance. The international world has not experienced a long-term, stable financial system after 1913. International financial systems have been periodically unstable, triggering financial crises and resultant economic depressions in different nations. Yet the global economy cannot develop properly without a stable international system, which distributes wealth to economically productive activities. How then can a stable and modern international-financial-system be constructed? In this provocative volume, the authors applies the cross-disciplinary analysis of societal dynamics to important economic writers to derive a new approach to the problem of stabilizing international financial systems.

Editorial Review

Users Review

From reader reviews:

John Whetstone:

As people who live in often the modest era should be up-date about what going on or data even knowledge to make all of them keep up with the era that is always change and advance. Some of you maybe will update themselves by examining books. It is a good choice for you personally but the problems coming to a person is you don't know what kind you should start with. This Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Annette Carroll:

Playing with family in the park, coming to see the sea world or hanging out with good friends is thing that usually you could have done when you have spare time, in that case why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics), you can enjoy both. It is fine combination right, you still would like to miss it? What kind of hang-out type is it? Oh occur its mind hangout folks. What? Still don't have it, oh come on its known as reading friends.

Loyd Tyler:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind ability or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your small amount of time to read it because this all time you only find publication that need more time to be study. Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics) can be your answer since it can be read by you who have those short spare time problems.

Catherine Mejia:

That book can make you to feel relax. That book Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics) was colorful and of course has pictures on the website. As we know that book Stability in International Finance: Applications of Price Disequilibrium Theory (SpringerBriefs in Economics) has many kinds or category. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and think that you are the character on there.

Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
