According to the ISM, CPSM is the credential that surpasses the demands of the international marketplace with multi-faceted skills in areas such as finance, supplier relationship management, organizational global strategy and risk compliance. The CPSM qualification enables professionals to gain a clear understanding of their organization's supply operation and enable managers to take an active role in critical decisions. It is slightly different from APICS's CSCP in that it is targeting those who wish to have a broad understanding of all components of the profession. It focuses primarily on strategic supply management, less on fundamental or tactical level knowledge. CSCP places heavier focus on integrated supply chain, while CPSM does not. To succeed in the CPSM exams, you need to get yourself truly familiar with the most important information by going through sufficiently focused revision. This is where we fill the gap - you may think of our product as the unofficial supplement to the regular training class, or you may view it as a standalone module with a focus on building up your exam readiness. There are three exams. Exam 1 covers the Foundation of Supply Management. Exam 2 covers Supply Management Performance. Exam 3 deals with Leadership. This book covers ALL these exams.
