From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) From Ingramcontent

This both accessible and exhaustive book will help to improve modeling of attention and to inspire innovations in industry. It introduces the study of attention and focuses on attention modeling, addressing such themes as saliency models, signal detection and different types of signals, as well as real-life applications. The book is truly multi-disciplinary, collating work from psychology, neuroscience, engineering and computer science, amongst other disciplines.

What is attention? We all pay attention every single moment of our lives. Attention is how the brain selects and prioritizes information. The study of attention has become incredibly complex and divided: this timely volume assists the reader by drawing together work on the computational aspects of attention from across the disciplines. Those working in the field as engineers will benefit from this book's introduction to the psychological and biological approaches to attention, and neuroscientists can learn about engineering work on attention. The work features practical reviews and chapters that are quick and easy to read, as well as chapters which present deeper, more complex knowledge. Everyone whose work relates to human perception, to image, audio and video processing will find something of value

in this book, from students to researchers and those in industry.

Users Review

From reader reviews:

Ginger Amundson:

What do you concerning book? It is not important along with you? Or just adding material when you require something to explain what the one you have problem? How about your free time? Or are you busy man? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Every individual has many questions above. They must answer that question mainly because just their can do in which. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this kind of From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) to read.

David Barr:

From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) can be one of your beginning books that are good idea. Most of us recommend that straight away because this book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The author giving his/her effort that will put every word into satisfaction arrangement in writing From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) yet doesn't forget the main level, giving the reader the hottest in addition to based confirm resource

information that maybe you can be among it. This great information can draw you into new stage of crucial imagining.

Jackie Ballesteros:

You can spend your free time to see this book this e-book. This From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) is simple to deliver you can read it in the park your car, in the beach, train along with soon. If you did not get much space to bring the printed book, you can buy the e-book. It is make you better to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Donald Sams:

Reading a book make you to get more knowledge from it. You can take knowledge and information from a book. Book is published or printed or illustrated from each source this filled update of news. On this modern era like now, many ways to get information are available for a person. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just in search of the From Human Attention to Computational Attention: A Multidisciplinary Approach (Springer Series in Cognitive and Neural Systems) when you essential it?
