

## 2015 Greenbook: Standard Specifications for Public Works Construction

From BNi Publications, Inc.

### 2015 Greenbook: Standard Specifications for Public Works Construction From BNi Publications, Inc.

Published every three years, this 2015 Edition represents the most comprehensive and important update in over a decade. Over 30 major changes have been added since the 2012 Edition. This new edition of the Greenbook is more consistent with Caltrans while going, in some ways, beyond the scope of Caltrans to meet the needs of local agencies more completely. The 2015 Edition adds new specifications for water system facilities and appurtenances and includes: \* An extensive revision of Section 306: Underground Conduit Construction, to address construction of both gravity and pressure pipelines \* A new Part 6: Temporary Traffic Control \* A new Part 7: Traffic Signal and Street Lighting Systems \* And a new Part 8: Landscaping and Irrigation The Greenbook is adopted by many municipalities for providing standard construction specifications on public works construction. It's especially useful when comparing competitive bids among contractors, or for contractors in making sure their bids conform to required specs. The Greenbook is designed to aid in furthering uniformity of plans and specifications accepted and used by those involved in public works construction and to take such other steps as are designed to promote more competitive bidding by private contractors.
