

Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59)

From The Mathematical Association of America

Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59) From The Mathematical Association of America

Undergraduate linear algebra is both beautiful and replete with real world applications and connections to the rest of mathematics. The purpose of the present volume is to enrich the understanding of linear algebra for a wide audience by placing a broad collection of short items in the hands of teachers, students, and others who enjoy the subject. Because undergraduate linear algebra is so fundamental to the mathematics curriculum, it is often taught by non-specialists and specialists alike. "Linear Algebra Gems" offers to all teachers clever ways in which core ideas can be presented to their students.

Most articles are accessible to those with modest preparation in linear algebra, including beginning students. However, many items will also contain pleasant surprises even to those well-versed in the subject. The editors have combed through the literature, and have selected from original submissions, to find expository articles and problems to enrich the reader's understanding. The seventy-three articles selected are organized into nine sections, with over 120 problems grouped into subject categories as a tenth section.

Contributors to the volume include experts in the field and long-time teachers of linear algebra. The book was prepared as part of a broad contract with the National Science Foundation to improve undergraduate linear algebra education. The editors hope that many readers will find enjoyment from this collection.

Editorial Review

About the Author

David Carlson is a professor of mathematics at San Diego State University. His professional interests include linear algebra and matrix theory.

Charles Johnson is a professor of mathematics at the College of William and Mary. His mathematical work has been in matrix analysis and combinatorics.

David Lay is a a professor of mathematics at the University of Maryland. His main areas of interest are functional analysis, and linear algebra.

A Duane Porter is a professor of mathematics at the University of Wyoming. His main areas of interest are matrix theory, finite fields, and the teaching of linear algebra.

Users Review

From reader reviews:

Carrie Porter:

Book is definitely written, printed, or created for everything. You can know everything you want by a publication. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading ability was fluently. A e-book Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59) will make you to end up being smarter. You can feel considerably more confidence if you can know about every thing. But some of you think this open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you trying to find best book or ideal book with you?

Eric Bittinger:

Book is to be different for every grade. Book for children until adult are different content. As you may know that book is very important usually. The book Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59) seemed to be making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The reserve Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59) is not only giving you considerably more new information but also for being your friend when you sense bored. You can spend your personal spend time to read your book. Try to make relationship using the book Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59). You never truly feel lose out for everything in case you read some books.

Kimberly Spradlin:

Nowadays reading books are more than want or need but also become a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book which improve your knowledge and information. The info you get based on what kind of publication you read, if you want send more knowledge just go with education and learning books but if you want really feel happy read one with theme for entertaining like comic or novel. Typically the Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59) is kind of guide which is giving the reader capricious experience.

Robert Baxter:

What is your hobby? Have you heard in which question when you got pupils? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person such as reading or as reading through become their hobby. You need to understand that reading is very important in addition to book as to be the point. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You get good news or update in relation to something by book. Different categories of books that can you choose to adopt be your object. One of them is this Linear Algebra Gems: Assets for Undergraduate Mathematics (The Mathematical Association of America Notes Series, Volume 59).
