Vaccine Free: 111 Stories of Unvaccinated Children By Andreas Bachmair

Vaccine Free - 111 Stories of Unvaccinated Children is a moving testament to the power of the body to take care of itself and the trust that people put in that natural process. In this book, based on research with more than 15000 participants from all over the world (www.vaccineinjury.info), you will find stories of families who investigated the vaccine topic carefully and thoroughly because they love and want to protect their children. These stories will educate you to not follow public opinion and propaganda but rather question what is happening and become informed when making decisions that pertain to the health of your children and our future generations.

I strongly recommend this book, knowing that the time you spend reading it will be time well spent, an investment in yourself and your children, which will indeed bring many rewards to your future health.

James R. Bowman, MD, ND

The study done by Andreas Bachmair and reported in this very important book and the personal stories of unvaccinated children reveal the tremendous difference in immune system disease between unvaccinated and vaccinated children.

Rebecca Carley, MD

Editorial Review

About the Author

Andreas Bachmair is a German homeopath who lives in Switzerland. Because he saw more and more vaccine damaged patients in his practice he initiated the website www.impfschaden.info to inform people about the dangers of vaccinations. Ten years later the website was translated into English under the name of www.vaccineinjury.info, and is now conducting an exceptionally thorough and comprehensive scientific survey on the state of health of unvaccinated children.
