Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) By Mohamed M. Shoukri

Measures of Interobserver Agreement and Reliability, Second Edition covers important issues related to the design and analysis of reliability and agreement studies. It examines factors affecting the degree of measurement errors in reliability generalization studies and characteristics influencing the process of diagnosing each subject in a reliability study. The book also illustrates the importance of blinding and random selection of subjects.

New to the Second Edition

- New chapter that describes various models for methods comparison studies
- New chapter on the analysis of reproducibility using the within-subjects coefficient of variation
- Emphasis on the definition of the subjects' and raters' population as well as sample size determination

This edition continues to offer guidance on how to run sound reliability and agreement studies in clinical settings and other types of investigations. The author explores two ways of producing one pooled estimate of agreement from several centers: a fixed-effect approach and a random sample of centers using a simple meta-analytic approach. The text includes end-of-chapter exercises as well as a CD-ROM of data sets and SAS code.

Editorial Review

Review

"The new edition of this book includes popular and important new topics on assessing agreement and reliability ... this book is very readable and it contains detailed examples and programming codes that can be easily followed and carried out by practicing statisticians. It is a valuable reference for someone who has limited background on assessing agreement and reliability."

?Huiman X. Barnhart, *Journal of the American Statistical Association*, September 2014, Vol. 109

"There are fairly substantial changes from the first edition. These include more focus on defining the subjects' and raters' populations, the loss of efficiency consequent on categorizing continuous scores, sample size determination, and pooling multicentre studies. Two new chapters are added, one on models for methods comparison studies, and one on the analysis of reproducibility using the within-subjects coefficient of variation. ... Overall the volume provides an accessible introduction to the area, at a sufficient depth for most practitioners."

?David J. Hand, Mathematics Department, Imperial College London, UK, in *International Statistical Review*

Praise for the First Edition:

... an important strength of this text is that it brings together technical results on agreement statistics from a variety of sources, and it often provides information about the precision of the estimates and interval estimates ... this text provides a handy compilation of statistical approaches to interobserver agreement ... biostatisticians ... are likely to find the summary and results to be helpful, and they will want to add this book to their collection.

?Patrick E. Shrout, New York University, *Statistics in Medicine*, Vol. 25, 2006

Mohamed Shoukri is well placed to write this book, as he is one of the foremost current researchers in this field. I recommend it.

?*Journal of the Royal Statistical Society*

The well-written specialized book by Shoukri illustrates the meaning and importance of the measures of interobserver agreement with fun examples. The author is known for clear presentation.

?*Journal of Statistical Computation and Simulation*, Vol. 75, No. 4, April 2005

This book can be recommended...

About the Author

Mohamed M. Shoukri is a principal scientist and the chairman of the Department of Biostatistics, Epidemiology, and Scientific Computing at King Faisal Specialist Hospital & Research Centre. He is also an adjunct professor of biostatistics in the Department of Epidemiology and Biostatistics, Schulich School of Medicine and Dentistry at the University of Western Ontario. Dr. Shoukri is a fellow of the Royal Statistical Society of London and an elected member of the International Statistical Institute.

Users Review

From reader reviews:

Ellen Wirth:

Reading a book tends to be new life style with this era globalization. With reading through you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can share their idea. Books can also inspire a lot of people. A lot of author can inspire their particular reader with their story or perhaps their experience. Not only the storyplot that share in the guides. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors in this world always try to improve their ability in writing, they also doing some study before they write to their book. One of them is this Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series).

Sophia Whitfield:

Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) can be one of your basic books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to put every word into satisfaction arrangement in writing Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) yet doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource facts that maybe you can be one of it. This great information can drawn you into brand-new stage of crucial pondering.

Craig Brown:

Can you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you never know the inside because don't judge book by its handle may doesn't work here is difficult job because you are frightened that the inside maybe not while fantastic as in the outside look likes. Maybe you answer could be Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) why because the fantastic cover that make you consider concerning the content will not disappoint anyone. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will directly guide you to pick up this book.

Jeffrey Ramsey:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as studying become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You get good news or update with regards to something by book. Amount types of books that can you go onto be your object. One of them is Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series).
